

SPELLBREAKER

A Concise 600-Point Walkthrough

Infocom (stories/spellbre.z3), played on the zAI-Machine interpreter with random seed 42. Final result: **600 of a possible 600, in 560 moves** — *Scientist*. Every command below is replayed by `SpellbreakerWalkthroughTests.Spellbreaker_PerfectScore`.

Written during play using the game's instruction manual as the only outside reference.

Know Before You Go

- **Cubes are doorways.** BLORPLE a held cube to reach its hub room. You can't BLORPLE from inside a hub, so step out first. Label each cube with the burin (WRITE "EARTH" ON CUBE) and refer to it by its label.
- **Seed-dependent details.** Many first casts "feel wrong" and misfire, so the script memorizes spares. Belboz asks one of six questions (here: the fireworks master, *Dimithio*). The odd vault cube is x7.
- **Death is a hub.** The cloaked figure revives you in the Boneyard with your possessions. The third death brings a warning, though, and this route dies only once.
- **Water ruins the spell book.** Keep it in the *closed* zipper whenever you swim or flood a room.
- **You can carry nine things.** The zipper is bottomless. Late in the game a held carpet serves as a tray.
- **The past must stay consistent.** Whatever you found in the present has to end up where you found it, or leaving the past kills you for good.

The Walkthrough

1. Borphee (score after: 25)
